

Home Assignment<3> Demonstrating Control Statements

Learning Objective:

To understand the conditional statement and logic to solve

Expected Completion Time:

Best Case: 10 minutes

Average Case: 15 minutes

Assignment Details:

Create a class named CheckNumberIsPositive with integer variable as version with value 10

-Write a logic to print the given number Positive or Negative.

Requirements:

Create a java class named CheckNumberIsPositive

- Declare a with integer variable as version with value 10
- Use Conditional Statement
- Print Number Positive

Hints to Solve:

- Check the Number is Greater than Zero

Expected Outcome:

By completing this assignment, you should be clear on

1. How to arrive logical solution for a problem
